# AUSDT WHITEPAPER ADDENDUM

## Monetary Framework Update, Transparency Infrastructure, and AUSDT 2.0 Upgrade

Supplement to the Original AUSDT Whitepaper — Version 1.0 — Issued 2026

### 1. Purpose of this Addendum

This document serves as an official addendum to the original AUSDT Whitepaper issued by Niisitapi Sovereign Bank.

The original whitepaper remains unchanged to preserve historical accuracy and institutional transparency.

This addendum introduces updates to terminology, compliance frameworks, transparency infrastructure,

insurance coverage confirmation, proof of reserves, and the AUSDT 2.0 upgrade.

### 2. Updated Monetary Terminology Framework

To align the system with banking and monetary policy terminology, the following terms are adopted:

Token → Digital Monetary Unit

Tokenization → Monetary Digitization

Token Supply → Monetary Issuance

Minting → Monetary Issuance Event

Burning → Monetary Retirement

Wallet → Digital Custodial Account

Niisitapi Sovereign Bank

Niisitapi™ Sovereign Nation of Aapaitsitapii™ Siksikaitsitapiskahkoo™

[info@niisitapicb.org](mailto:info@niisitapicb.org)

KTT: (051) 210565 NSOVBK G

[niisitapicb.org](http://niisitapicb.org)

Blockchain → Distributed Monetary Ledger  
Smart Contract → Automated Monetary Instrument  
Stablecoin → Reserve-Backed Digital Monetary Instrument

### 3. Compliance Terminology Update

References to MiCA in earlier documents should now be interpreted as Global Compliance Standards.

The AUSDT system operates under internationally aligned financial compliance including AML/KYC, cross-jurisdictional regulatory compatibility, and financial conduct standards.

### 4. AUSDT Digital Currency Upgrade — Version 2.0

The AUSDT system has been upgraded to Version 2.0 introducing improved compliance architecture, governance controls, administrative recovery capability, and interoperability for financial systems.

Network: ALLTRA SmartChain (ALL Mainnet)

Token Standard: ERC-20 compatible

Contract Address: 0x015B1897Ed5279930bC2Be46F661894d219292A6

### 5. Transparency Infrastructure

AUSDT maintains a public transparency endpoint allowing real-time verification of supply and reserves.

Transparency Endpoint: <https://alltra.azurewebsites.net/api/nsb-ausdt-reserve>

This endpoint displays total supply, reserve backing, and insurance reserves.

### 6. Custodial Reserves and Proof of Funds

Proof-of-funds documentation confirms liquidity reserves totalling approximately USD \$550,000,000,000 supporting the AUSDT issuance infrastructure.

### 7. Insurance Coverage

AUSDT infrastructure is protected by crypto-cyber insurance coverage issued by SP Monza Insurance Holdings.

Each Occurrence Coverage: \$25,000,000,000  
General Aggregate Coverage: \$550,000,000,000

## 8. Legal Classification

Independent legal analysis concludes that AUSDT should not be categorized as a security under

United States federal securities law and functions as a collateralized digital payment instrument.

## NIISITAPI – AAPAITSITAPII INDIGENOUS INSURANCE CORPORATION (NAIC)

---

September 8<sup>th</sup>, 2024

At a Special Meeting of the Board of Directors of Niisitapi Sovereign Bank ("NSB"), duly enacted under the Banking Act 2021 Sovereign Aapaitsitapii Siksikaitsitapiskahkoo Government (the "Banking Act") and under the Prudential Supervision Authority of Niisitapi Aapaitsitapii Indigenous Insurance Corporation, a motion was made to issue a General Insurer licence to RABEN INVESTMENTS LIMITED D/B/A **SP MONZA BANK**, AND UNDER THE NAME OF **SP MONZA BANK**.

**Motion:** (i) To approve **SP MONZA BANK** as DBA for RABEN INVESTMENTS LIMITED; and (ii) To approve and issue a General Insurer license to Raben Investments Limited under the name of **SP MONZA BANK**.

The licence granted is subject to the following:

### Governance requirements Background

1. A licensed insurer must have sound corporate governance arrangements, both at the time of licensing, and during ongoing operations.
2. This guideline sets out the minimum governance requirements for licensed insurers. The governing body will continue to have ultimate responsibility for the governance of the licensed insurer.
3. Niisitapi Sovereign Bank must be satisfied that Licensee's incorporation and ownership structure, ownership, and governance structure are appropriate, taking into account the size and nature of the applicant's business or proposed business, including the size and type of the insurance business, and the size and type of risks to be insured.
4. Suitable ownership is important to promote public confidence in the insurance sector, as insolvent or fraudulent owners may compromise policyholders. Niisitapi Sovereign Bank must be satisfied that owners do not pose a risk to policyholders' interests, and may consider matters such as:
  - (a) integrity demonstrated in personal behaviour and business conduct;
  - (b) soundness of judgment; and,
  - (c) financial soundness.
5. The licensed insurer's governance structure needs to be sufficiently sophisticated to ensure effective oversight of its activities, taking into account the size and nature of

Niisitapi Sovereign Bank

Moccasin Flats Plaza, Unit 5, Standoff, AB T0L 1Y0

Niisitapi™ Sovereign Nation of Aapaitsitapii™ Siksikaitsitapiskahkoo™

[info@niisitapicb.org](mailto:info@niisitapicb.org)

KTT: (051) 210565 NSOVBK G

[niisitapicb.org](http://niisitapicb.org)

- the business. Niisitapi Sovereign Bank must be satisfied that the governance structure is appropriate, and that the governing body is operating effectively.
6. It is important that the governance of the licensed insurer is kept separate from its ownership; responsibilities should be allocated accordingly through a formal charter. There should also be processes in place to provide the governing body with information to identify, monitor, and manage risks.
  7. Governance arrangements should be disclosed to shareholders or member policyholders, and other stakeholders. It is expected that a licensed insurer will include a corporate governance statement in its annual report, including a statement of its corporate governance policies, practices, and processes, as well as information about the directors, how the governing body operates, and any committees of the governing body.
  8. For a licensed insurer who operates as a friendly society, there may be instances where different terminology is used to cover the same position.
  9. Licensed insurers need to consider who within their organisation performs the tasks of director, Chief Executive Officer and Chief Financial Officer, and ensure those in each position meet the requirements.
  10. The governing body of the licensed insurer should establish a separate audit committee to review the effectiveness of the licensed insurer's financial reporting, internal audit, and risk management framework. The audit committee should be of a sufficient size to be able to manage the functions it carries out.
  11. The majority of the audit committee members will be independent as defined in this guideline. The audit committee can have directors as members, but director membership is not mandatory. The audit committee will report to the governing body, and it is the governing body that is responsible for audit committee decisions. It is expected that the chair will be independent, and should not be the chair of the governing body itself. At least one member of the audit committee should have a finance or accounting background.
  12. Depending on the size and type of the licensed insurer's business, the Reserve Bank expects the governing body to establish other committees, such as:
    - (a) a remuneration committee, to establish a remuneration policy and procedures, and recommend remuneration packages for directors;
    - (b) a compliance committee, to ensure compliance with regulatory requirements;
    - (c) a risk committee, to monitor and assess the licensed insurer's risks and advise the governing body and senior managers on them; and,
    - (d) a nomination committee, to recommend director appointments.
  13. In the absence of these additional committees, responsibility for these matters falls to the Board.

14. Each committee should have its own formal terms of reference. The governing body remains responsible for ensuring that functions delegated to a committee are performed.

Motion - Seconded – Carried

## Appendix C

### AUSDT 2.0 (USDT2.0)

#### Secure, Compliant, and Recoverable Digital Payments on ALLTRA SmartChain

**Token Address:** `0x015B1897Ed5279930bC2Be46F661894d219292A6`

**Network:** ALLTRA SmartChain (ALL MAINNET) – EVM Compatible

**Token Standard:** ERC-20 compliant

---

#### Overview

AUSDT 2.0 (USDT2.0) is a purpose-built ERC-20 token deployed on the EVM-compatible **ALLTRA SmartChain**, developed to serve as a secure and compliant payment asset across the ALLTRA financial ecosystem. Designed with global current standards aligned architecture and future-proof security controls, AUSDT 2.0 empowers digital commerce with administrative recovery, compliance, and modular integration.

---

#### Core Security & Compliance Features

##### Global standards-Ready & Upgradable

- Architected for **Global standards**.
- **Upgradeable smart contract** structure enables alignment with evolving regulations and technical improvements.

##### Administrative Controls with Granular IAM

- **Access Manager System** handles all restricted administrative functions with **granular role-based permissions**, enabling secure operational delegation.
  - Example: A designated account may trigger an **emergency pause**, but **only the super admin** can resume transfers.
- Ensures **internal access control and security separation** for core functions.

##### Token Lifecycle Management

- **Pause / Un-pause** capability for end-of-life or emergency intervention.
  - **Blacklist Functionality** to block transfers **to and from** compromised or sanctioned addresses.
  - **Admin Mint & Burn** to or from **any account**.
  - **Administrative Transfers** can override blacklist checks, enabling **recovery of stolen or lost tokens** securely and legally.
- 

#### Interoperable Access Management

The **centralized Access Manager** is designed to be reusable across future smart contracts, forming the backbone of a **chain-wide on-chain Identity and Access Management (IAM)**

[niisitapicb.org](http://niisitapicb.org)

framework. This modular design enables other contracts to **plug into the same IAM system**, ensuring consistent, secure role governance throughout the Alltra ecosystem.

---

### Utility & Use Case

AUSDT 2.0 is the foundational token for transaction, payment, and merchant systems across ALLTRA's ecosystem, supporting:

- Instant settlement
  - Gateway and financial integrations
  - DeFi modules with enforced compliance
  - Core-banking and smart finance solutions
- 

### Built on ALLTRA SmartChain — A Gold-Backed, Purpose-Built Financial Layer
